Multimodal Pedagogy

01

Defining Multimodality

Multimodality: making meaning through the transposition, representation, combination, and integration of different semiotic forms – text, speech, audio, video, texture, etc.

Multimodal literacy. the ability to use and combine different semiotic modes that are appropriate to a given context (Lim and Tan-Chia, 2023) in order to create or evolve meaning.

Project Research Questions

Overall RQ: How is Generative AI being used in multimodal learning in higher education contexts?

- RQ1: What are the **learning designs** of multimodal learning using GenAI?
- RQ2: What are the **outcomes and impact** of the use of GenAI for multimodal learning?
- RQ3: What are the **opportunities and challenges** of using GenAI for multimodal learning in HE?
- RQ4: What are the **inclusivity, sustainability and ethical considerations** of using GenAI for multimodal learning?

Assessment Case Study

03

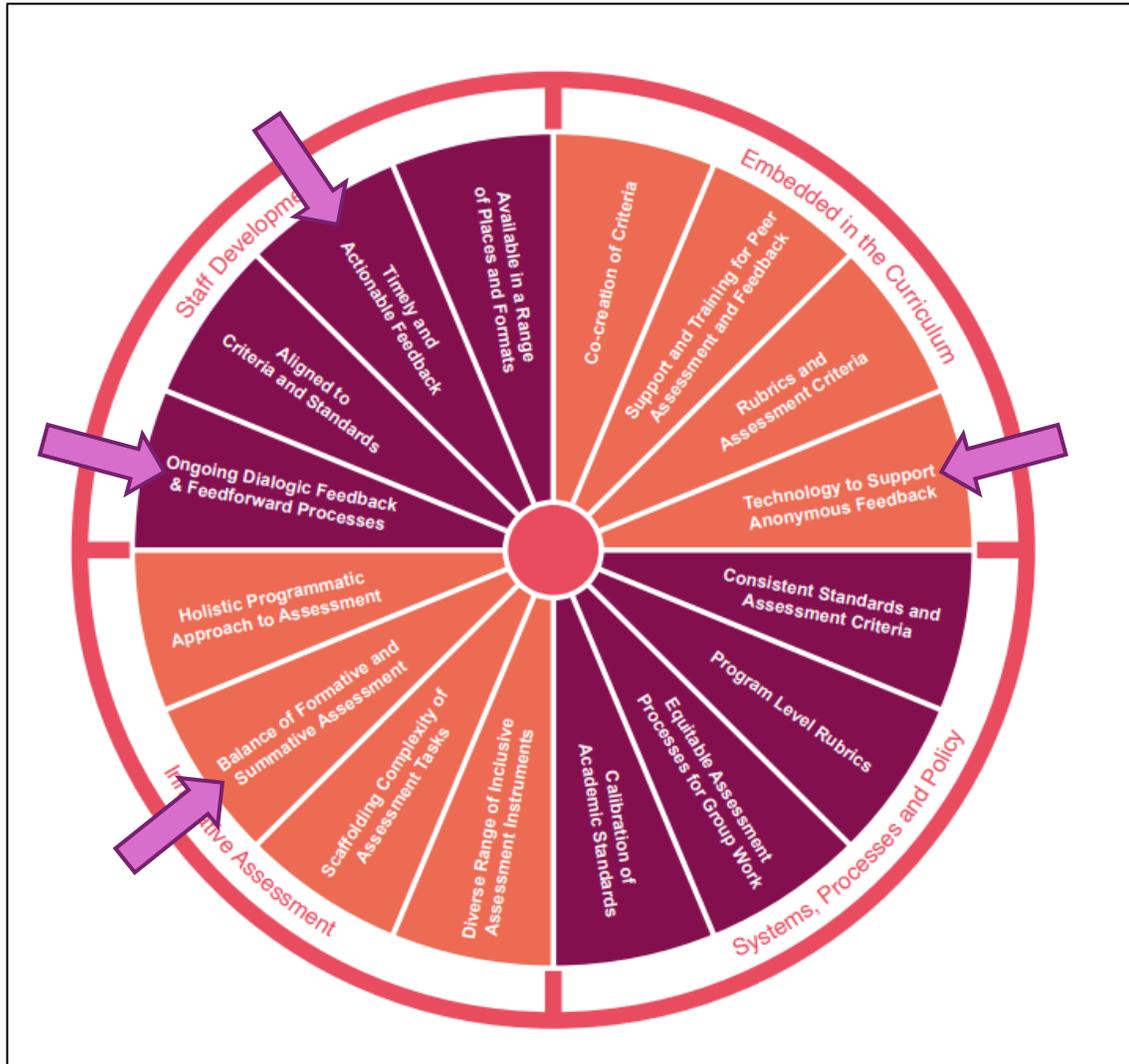

Assessment Case Study: Description and Process

Use of Notebook LM to generate a podcast of:

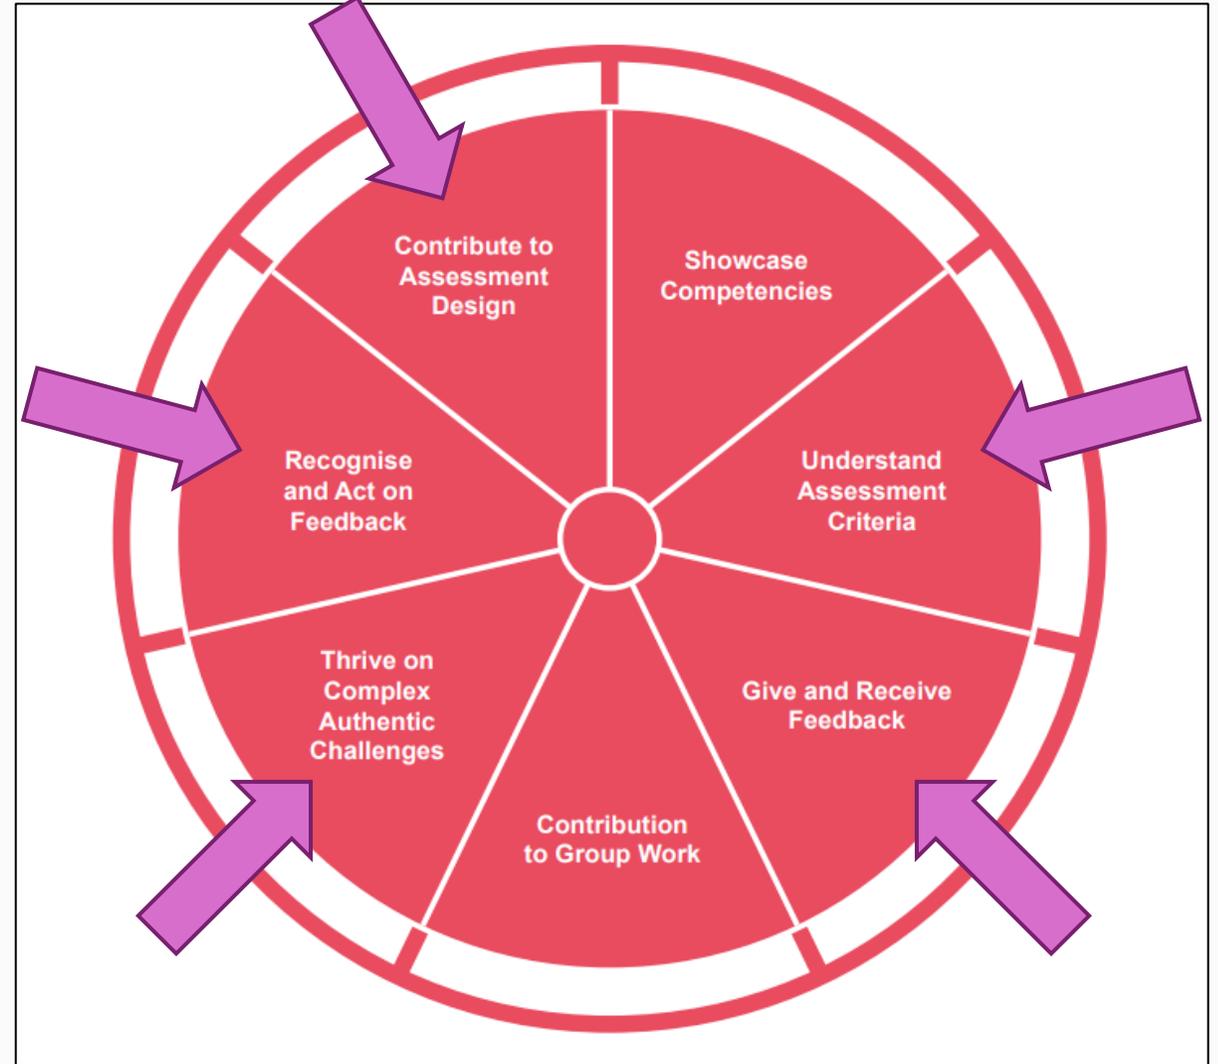

- a) Students' assessment briefs/assessment descriptions, to aid in the development of assessment literacy and understanding of the task/its completion/the feedback process.
- b) Students' formative work – a formative essay written ahead of the full summative essay at the conclusion of the module ('Victorian Murder and Other Crimes', MA Victorian Studies). Students upload their formative work to Notebook LM, listen to the podcast it generates, and then reflect on how well it engaged with the work and how helpful it is in preparing them for the summative task.

Students then complete a short evaluation form/questionnaire to reflect on the effectiveness and usefulness of the exercise (TBC).

Framework for Enhancing Assessment

Institutional or Departmental Policy

Student-Centred Dimension

Next Steps

04

Next Steps

Assessment group is performing this case study on modules that start in **January 2025**.

The case study will also be presented/discussed as part of an online **symposium** hosted by the project team, via the University of Liverpool, on **21 January 2025**.

Post-implementation: analysis of results, write-up of case study, and inclusion in the wider **Generative AI and Multimodal Learning** guide for educational developers, currently under construction by the wider project group.

Beyond Text : Symposium

Generative AI
in multimodal
teaching,
learning and
assessment

Location: Online

Date: 21 Jan 2025

Time: 09:30-12:00 UK/GMT

10:30-13:00 CET

17:30-20:00 CST

[Register with Eventbrite](#)

Come along to our international symposium where we present and discuss and practise the uses of generative AI in education in beyond-textual contexts, such as AI-generated images, videos, sound.
